CedarLast Faucet Kit

This handy kit creates a dedicated outdoor faucet for your CedarLast Potting Bench! Use it to water plants, clean pots, rinse vegetables, or fill up watering cans. It also includes Quick Connectors that allow you to easily connect and disconnect your hose and faucet. **Important:** The Faucet Kit is intended to be used with the CedarLast Potting Bench (sold separately).

**Part List**
- A. Angle Couplers (2)
- B. Short Hose (1)
- C. Bracket (1)
- D. Short Caps (2)
- E. Plastic Tube (1)
- F. Quick Connector (1)
- G. Long Caps (2)
- H. Long Hose (1)
- I. Hose Coupler (1)
- J. Spring (1)
- K. Shower Head (1)
- L. Hose Adapter (1)
- Screws (4)

**Tools Required**
- Phillips Screwdriver

**Assembly**

**NOTE:** Use the Parts List and Figure 1 to identify each part. **NOTE:** The Short and Long Caps come preattached to the Couplers and Connectors. Please remove them before starting Assembly.

**Step 1.** Place the exposed end of an A. Angle Coupler through the front opening in the C. Bracket (Figure 2). Push the B. Short Hose into the end of the Coupler, pressing it firmly into place. Slide a D. Short Cap over the Short Hose and screw it onto the end of the A. Coupler.

**Step 2.** Position the C. Bracket on the back of your Potting Bench, as shown in Figures 1 & 3. Use your Screwdriver to insert Screws through the 4 holes in the Bracket and into the Trellis, attaching it to the Potting Bench.

**Step 3.** Slide the remaining D. Short Cap onto the Short Hose with the threads facing outward. Push the open end of the Hose into the remaining A. Angle Coupler and screw the Cap onto the end of the Coupler (Figure 4).

**Step 4.** Slide the E. Plastic Tube into one end of the H. Long Hose (Figure 5). Place the same end of the Long Hose into the end of the F. Quick Connector and use a G. Long Cap to secure them together (Figure 6).
Step 5. Slide the J. Spring onto the H. Long Hose, pressing it down so you have space to slide the remaining G. Long Cap onto the Hose. **NOTE:** This step is easiest with 2 people. Use the Long Cap to attach the I. Hose Coupler to the end of the Long Hose (Figure 7).

Step 6. Snap the K. Shower Head onto the end of the I. Hose Coupler.

Step 7. Screw the L. Hose Adapter onto the end of your garden hose and push it into the A. Angled Coupler on the back of the Potting Bench (Figure 8).

To use the faucet, turn on the water for your hose and turn the red dial on the I. Hose Coupler to the right. When you’re done turn the dial to the left to stop the water.
