Pro Weed Mat, 3' x 50'

Our durable, tear-proof mat blocks grass and weeds in garden paths, between raised beds, and around shrubs and trees, while allowing air, water and nutrients to pass through. It’s made of the same heavy-duty polypropylene that nurseries and professional landscapers use.

The Pro Weed Mat may be left in place for years or taken up at the end of the season to be used again the following year.

**Installation**

**Step 1.** Prepare the ground by removing existing weeds, turf and rocks. Rake smooth.

**Step 2.** Unroll the Pro Weed Mat to the desired length and cut to fit with scissors. To cover areas wider than 3’, overlap the edges of the mat by at least 6” to prevent weeds from growing up between the sections.

**Step 3.** Use rocks, soil or our Earth Staples (optional) to hold the mat in place. Tuck the cut ends under to prevent fraying, and fasten in place. If using the mat for weed control around raised beds, tuck at least 6” of the mat underneath the edges of the bed to hold it in place and to prevent weeds from growing between the mat and the bed.

**Tip:** Covering the mat with a 1” to 3” layer of mulch protects it from sunlight and extends its years of use in the garden.
