

## Great Crate Grow Kit

Place the grow bag liner into the wood crate and fold the top edge down inside the crate so it is even with the top edge. Add  $\frac{1}{2}$  cup of fertilizer to the full 20 quarts of potting mix, blend well, and pre-moisten. Fill the crate to within 1 – 2" of the top edge. Add your plants, as well as any additional planting mix as needed.

**Note:** Your Great Crate Grow Kit is intended for outdoor use only. The grow bag liner is permeable and designed to let excess water drain freely.
