This lightweight wheelbarrow is perfect for light duty jobs. It’s portable and folds flat for easy storage. The vinyl can handle all kinds of messes and is easy to clean.

**Parts**
(1) Wheelbarrow Frame  
(1) Wheel  
(1) Pre-attached Long Bolt with Washer and Nut  
(2) Pre-attached Medium Bolts with Washers and Nuts

**Tools Required**
Flathead screwdriver  
Phillips screwdriver  
10mm & 12mm wrenches or an adjustable wrench

**Assembly**

*NOTE:* Assembly is easiest with two people.

**Step 1.** Lay the folded Wheelbarrow Frame down on a flat, clean surface.

**Step 2.** Remove the Long Bolt, Washer and Nut from the Wheelbarrow Frame (Figure 1). Place the Wheel into the open spot, lining up the holes in the Frame with the holes in the Wheel.

**Step 3.** Slide the Large Bolt through the lined-up holes and place the Washer onto the end of it. Use your flathead screwdriver and 12mm wrench to tighten the Nut onto the Large Bolt (Figure 2).
Step 4. Examine the Wheelbarrow Frame to find the Medium Bolts (Figure 3) and remove them along with the Washers and Nuts.

Step 5. Examine one of the handles (Figure 3) to find the empty holes near the bottom of it. Lift the handle so you can line up the holes with the ones where the Medium Bolt used to be. Slide a Medium Bolt through the set of holes and place a Washer onto the end of it. Use your Phillips screwdriver and 10mm wrench to tighten a Nut onto the Bolt (Figure 4).

Step 6. Repeat Step 5 with the other handle.

Your assembly is complete! Just unfold the Wheelbarrow and you are ready to work.

The Folding Wheelbarrow holds up to 44 lbs.
