

GARDENERS SUPPLY COMPANY

Super Hoops Base, set of 6

This innovative base reinforces your existing Gardener's Super Hoops or Hi-Rise Hoops. Adapts 3 complete hoops (2 bases per hoop).

Assembly

- Step 1.** Take 2 Super Hoop Bases and place them on opposite sides of your garden bed. Press them into the ground up to the first crosspiece.
- Step 2.** Slide one side of your Super Hoops into a Super Hoop Base. Arch the Hoop over your bed and slide the remaining side into the other Base. Adjust the Hoop so it is at the desired height and tighten the knobs to secure it into place (Figure 1).
- Step 3.** Repeat Steps 1 & 2 to install your remaining 2 hoops approximately 3-4' apart. Drape your fabric over them and secure it to the hoops. Leave at least 4" of extra fabric on either side of the tunnel, and plenty of fabric on the ends of the tunnel to reach the ground.
- Step 4.** Pull the fabric taut on both ends and at the sides. We find it helpful to pin the excess fabric to the soil using Earth Staples (sold separately). You can also anchor the fabric with something heavy (stones, bricks, or wood) so it's easy to access your crops when watering, fertilizing and harvesting.
