Titan Customizable Wall Trellis

Create the perfect trellis for your space with the Titan Customizable Wall Trellis. It is made from polyethylene-coated steel that will last for years to come. The polyethylene is uv-stable and provides a clean look while protecting the steel from the elements. The steel tubing provides strength and durability, yet is also lightweight and easy to assemble.

Parts

- (6) 35- $\frac{1}{4}$ " Bars
- (6) 45- $\frac{1}{4}$ " Bars
- (36) Clips
- (4) Wall Brackets
- (4) Screws
- (4) Screw Anchors

Tools needed

- Drill

Assembly

Start by laying the Bars in a grid, the 35- $\frac{1}{4}$ " Bars going one way and the 45- $\frac{1}{4}$ " Bars going the other. Once all the Bars are placed, attach them together by pressing them into the Clips at each spot where they intersect (Figure 1). The Clips rotate so you can adjust the angle of the Bars.

NOTE: The Clips are made of 2 pieces. If they come apart as you're handling them, simply reattach them by inserting the end of one Clip into the other and twisting them in opposite directions.

Installation

NOTE: The Trellis comes with Hanging Hardware that may or may not be suitable to your type of wall. Before proceeding with installation, please research what type of hardware you will need. You can find other types at your local hardware store. The instructions on the other side are for the hardware that comes with our Wall Trellis.

over please

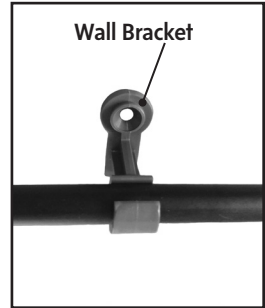

Installation, continued

Attach a Wall Bracket to what will be the top and bottom Bars of your Trellis, positioning them so they are above the Bar as shown in Figure 2. Hold your Trellis against your wall in the desired position and use a pencil to mark the locations of the holes in the Wall Brackets. Put your Trellis to the side. At each mark, drill a hole in the wall that is the same size as the Screw Anchors. Push an Anchor into each hole.

Hold your Trellis back up to the wall, lining up the holes in the Wall Brackets with the Anchors. Place a Screw through each Wall Bracket and into the Anchors. Your assembly is complete!

The Titan Customizable Wall Trellis folds up for easy storage when it's not in use.
