

Ithaca Tea Light Stake

Whether it's dotting the winter landscape or illuminating a garden path, this stake can be enjoyed year-round. The textured black finish on the outside contrasts with the gold-colored finish on the inside to create a dramatic light.

The base of the lantern area is easily removed, allowing you to insert your LED tea light and twist the base back into place (Figure 1).

CAUTION: Do NOT use real candles with the Ithaca Tea Light Stake. The metal will absorb the heat and make the stake dangerous to handle. Instead use LED candles, which are safer and more convenient. We recommend using our LED Tea Lights (sold separately). They provide a warm glow with an authentic flicker.
