

GARDENERS SUPPLY COMPANY

Iris Garden Screens

Make a beautiful display in your landscape with our Iris Garden Screens. They are the perfect backdrop for your flower beds and border gardens. You can install each screen individually or group them together. **NOTE:** The Iris Garden Screens are sold both individually and as sets (shown below).

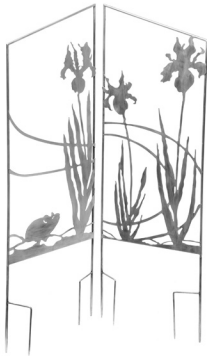

Installation and Care Instructions

Before placing a Screen, remove the black caps from the Stakes. Slide the prongs on the bottom of the Screen into the tops of the Stakes. **Important:** For stability, position the Stakes so they are perpendicular to the Screen, then use your foot to press them into the ground.

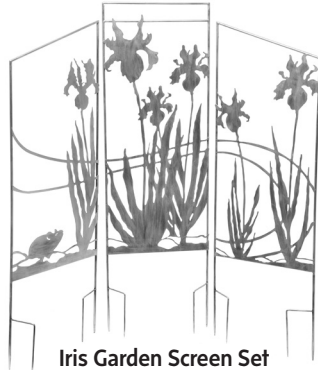

The powder-coated steel is weather-resistant. However, if the finish is nicked or scratched, use an exterior-grade metal paint to prevent rust. The Iris Garden Screens can be left outdoors year-round.
