

## **Round Copper Plant Trays Rectangular Copper Plant Trays**

Simply elegant, watertight trays showcase your favorite plants while protecting surfaces from water damage. Place them under your indoor plants to use as saucers. Fill with stones and add water to create an instant humidity tray for orchids or herbs. Make a living tablescape by planting with succulents or arrange with curios and votives for a stunning centerpiece.

They're made from copper-plated steel with pads on the bottom to prevent scratches. Please note:

- Water plants sparingly as there are no holes in the bottom for drainage.
- The copper will age to a patina over time. Polish the copper to remove the patina and restore to its original sheen.
