## Essex Plant Stand

The Essex Plant Stand is an elegant way to show off your prized plants. With its weather-resistant powder coating, you can use it both indoors and out.

### Parts List

- (2) Side Panels
- (1) Back Panel
- (3) Shelves (SM, MD & LG)
- (4) Bolts

### Tools required

- Phillips screwdriver

### Assembly

**Step 1.** Examine the Side Panels and the Back Panel.

Notice how the Back Panel has narrower outer uprights with knobs while the Side Panels have thicker outer uprights with holes (Figure 1). Line up the knobs on the Back Panel with the larger holes on one of the Side Panels and slot the two Panels together.

**Step 2.** On the outside of the same Side Panel, place Bolts into the two smaller holes on the outer upright and use a Phillips screwdriver to screw them loosely into place (Figure 2).

**Step 3.** Repeat Steps 1 and 2 to attach the other Side Panel to the Back Panel.

**Step 4.** Place the Large Shelf on the bottom set of hooks and slots on the Side Panels (Figure 3). Place the Medium Shelf on the middle set of hooks and the Small Shelf onto the top set. Go back and tighten the screws with a Phillips screwdriver. Assembly is complete!

Each shelf holds up to 30 lbs, evenly distributed. We recommend placing stakes or screws (not included) through the tabs on the bottoms of the Side Panels if you are using the Stand outside in windy areas or on uneven ground.

The powder-coated steel frame is weather-resistant. However if the finish is nicked or scratched, use an exterior-grade metal paint to prevent rust.

## Essex Quarter Round Plant Stand

The Essex Quarter Round Plant Stand is an elegant way to show off your prized plants. With its weather-resistant powder coating, you can use it both indoors and out.

### Parts List

- (1) Left Side Panel
- (1) Right Side Panel
- (3) Shelves
- (2) Bolts

### Tools required

- Phillips screwdriver

### Assembly

**Step 1.** Examine the two Side Panels, and notice how the Left Side Panel has a narrower outer upright with knobs while the Right Side Panel has a thicker outer upright with holes on both sides (Figure 1). Line up the knobs with the larger holes and slot the two Panels together.

**Step 2.** On the outside of the Right Side Panel, place the Bolts into the smaller holes on the outer upright and use a Phillips screwdriver to loosely screw them into place (Figure 2).

**Step 3.** Place a Shelf on each set of hooks and slots on the Side Panels (Figure 3). Go back and tighten the screws with a Phillips screwdriver. Assembly is complete!

Each shelf holds up to 30 lbs, evenly distributed. We recommend placing stakes or screws (not included) through the tabs on the bottoms of the Side Panels if you are using the Stand outside in windy areas or on uneven ground.

The powder-coated steel frame is weather-resistant. However if the finish is nicked or scratched, use an exterior-grade metal paint to prevent rust.

## **Essex Plant Stand Trays**

### **Essex Quarter Round Plant Stand Trays**

These elegant trays provide just the right touch to complete the perfect showcase for your plants. They're made to fit the shelves of the Essex Plant Stands (sold separately), and their beautiful antiqued copper plated finish will provide a stunning contrast to the matte black shelving. Place them under your plants to catch runoff, or add pebbles and sea glass to create humidity trays.

Please note:

- The trays are watertight with no holes in the bottom for drainage. Be careful not to overwater your plants.
- The copper will age to a patina over time. Polish the copper to remove the patina and restore to its original sheen.
