

## Victorian Lace Bird Feeder

This bird feeder is both decorative and functional with its beautiful lace details and a design made to discourage squirrels and larger birds.

The inner tube holds 6 cups of birdseed. The size of the mesh makes it perfect for a variety of birdseeds including sunflower seed, black oil sunflower seed, safflower seed and many mixed seed blends.

Secure the lid into place by sliding the pins on it into the cutouts on the top of the tube and turning counter-clockwise.

The feeder is not recommended for use with thistle/niger seed, large peanut pieces or finch mix blends.
