

## **Birch Micro LED Outdoor Branches**

Like moonlight on a frosty tree, these birch branches glow with pinpoints of light. They are painted to resemble birch and are lit with warm white, micro LEDs for a magical touch. Place your Branches in a decorative pot and display them in your entryway, on a table, by your fireplace or even outdoors on your porch or in your garden.

Carefully bend the Branches to add volume and shape. You can use multiple sets for a fuller look and add fresh greens, ornaments and garland for a festive touch.

The Birch Micro LED Branches use a weatherproof outlet plug and are safe to keep outdoors year-round.
