

Toulouse Blown Glass Candle Lantern

Using an ancient technique called captured glass, molten glass is hand-blown directly into the wire frame, making each Toulouse Blown Glass Candle Lantern a unique work of art.

CAUTION: Do NOT use real candles with it. Instead use LED candles, which are safer and more convenient. We recommend our 3" x 4" LED Pillar Candle (Sold Separately). It provides a warm glow with an authentic flicker.

Store the lantern indoors during inclement weather and when not in use.

NOTE: During production, the protective coating on the wire comes in contact with the glass and is burned away, which may allow rust to form. This is normal and won't affect the function of the lantern.
